Quantum2

SERIOUS ENERGY

Windows for Improved Home Energy Performance and Comfort

Today's homeowner knows that replacing windows involves more than just a trip to a hardware store. Your selection will have a lasting affect on the look of your home and your family's comfort. SeriousWindows 600 Quantum2 are the finest vinyl window and door products in the industry - delivering high performance energy efficiency benefits, strength and durability - and are available in a wide array of interior/exterior colors, styles and designs.

Quantum2 windows exceed Energy Star ratings and qualifies for a federal tax credit. These windows keep you cooler in the summer by reflecting solar heat and warmer in winter by keeping furnace heat inside. With a Lifetime Warranty and Glass Breakage Warranty, the Quantum2 is one of the most desirable replacement window in the industry.

Designed to give you a remarkable combination of looks, reliability, performance and serious value, the Quantum2 is the only choice when quality cannot take a backseat to cost.

Add an elegant garden, bay, or bow window and bring an extended, panoramic view of the outdoors into your home.

The Anatomy of Energy Efficiency

At the heart of every Serious Energy window is an advanced super-insulating glass package that features cutting-edge, energy efficient technologies. Serious Energy uniquely designs its windows with glass packages that are optimized to enhance the overall performance of the window for your particular climate. It is this combination of thermally-insulated frames and high-performing glass packages that allows us to deliver some of the most energy efficient windows in the market.

SeriousGlass 10 PowerQ with R-10 COG Insulating Power

Two Panes of Double Strength Glass

For increased durability and strength.

Two Lites of High Performance Low-E Glass

Specially insulated to provide additional insulation against the re-radiated heat from outside entering the air-conditioned home.

Suspended Film

Reflects direct and indirect solar heat out and away from the room, dramatically reducing energy consumption. SeriousGlass 10 PowerQ blocks up to 99.7% of damaging ultraviolet radiation produced by the sun. SeriousGlass 10 PowerQ glass system reduces noise levels 40% greater than single pane windows.

Twin Air Spaces Filled With Krypton

To provide superior insulation against the transfer of heat to or from the outside.

Dual Warm Edge Spacer Technology

Used for strength and rigidity, these twin spacers provide superior support of all glazing products.

Dual Sealant System

Polyisobutylene (PIB) and polyurethane provide a superior preventative barrier around the glazing perimeter to drastically reduce the risk of seal failure.
